

**AGRICULTURE FACILITY RENTALS BY STUDENTS**

Agriculture students will be allowed the free use of agriculture facilities necessary to complete assigned projects at a level which would allow the student to earn an "A" grade.

Students may be allowed to conduct additional projects, if facilities are available, on a fee basis. Fees for the use of agriculture facilities are specified in the Board-approved fee schedule for use of facilities. Optional projects are to be strictly voluntary for the student and the agriculture staff and must conform to the schedules established for assigned projects and the scheduled use of the agriculture facility.
