

**STUDENT ASSESSMENT PROGRAM**

Systematic assessment of student characteristics (i.e. aptitudes, abilities, achievement, interests, attitudes, etc.) is essential in assisting students to make appropriate decisions about their future. The District shall develop and maintain a student assessment program that will provide appropriate data about all students. Special student assessment programs (i.e. scholarship, college entrance examinations, career guidance, etc.) may be provided to those students requesting them. Any fees required by such special programs shall be paid by the student. The administration shall develop necessary rules and regulations governing the management of all student assessment programs.
