

STUDENT ACTIVITIES

Student activities which are complementary and supplementary to classwork are valuable educational experiences for students. The Fullerton Joint Union High School District is firmly committed to this premise. The total school program can be enhanced by this extension of the classroom learning situation. The wise teacher uses student activities to enrich classwork and motivate pupils to explore creatively beyond the scope of prescribed classroom hours. Hence, staff members are urged to attend and sponsor student activities. Their presence is an encouragement to students, making them feel that the faculty has an interest in student activities. Further, attendance at student activities may extend the staff member's understanding of youth, their customs and developing values.

The staff shall develop the necessary rules and regulations to implement a balance, well-organized and supervised program of student activities.
