

OPEN/CLOSED CAMPUS

Each campus shall have the option to establish an open or closed campus. The decision to open the campus shall be made following a study by a parent-student-staff committee which shall recommend to the Principal. Students, parents, and the community served by the campus shall be notified of the study, the goals and proposed rules for the program, as well as the procedures for providing input to the committee's study. The Principal will determine whether to open or close the campus and will designate the rules under which the open or closed campus program will be operated.

Periodically each campus must review the decision to have an open or closed campus. The procedure for review will be determined by the principal and will include consultation with students, parents, staff members, and community members.
